Organized and managed college-level tech fests and cultural programs, ensuring smooth execution and active participation.

Avid Reader
Regularly reads fiction and non-fiction to enhance language skills, creativity, and critical thinking.

CAREER OBJECTIVE

Full Stack Developer with hands-on MERN stack experience, having built real-world applications featuring multi-role authentication, real-time tracking, dashboards, and responsive design. Eager to contribute to a dynamic engineering team and grow as a developer.

TECHNICAL SKILLS

Frontend	HTML, CSS, JavaScript, React.js, Bootstrap
Backend	Node.js, Express.js, REST API, JWT Auth
Database	MongoDB
Tools	Git, GitHub, Vercel, Postman, VS Code

PROJECTS

- Today Shop — E-Commerce Platform

MERNStack

 - Built multi-role authentication for customers, admins, seller and delivery agents using JWT
 - Implemented real-time order tracking, admin dashboard, and delivery management panel
 - Developed full cart and checkout workflow with responsive design across all devices
- Amazon Clone

MERN Stack

 - E-commerce site with user authentication, product listings, and admin product management
- Happy Calculator

React.js

 - React calculator app with role-based admin and user dashboards
- 3D Solar System

Three.js

 - Interactive animated solar system with orbital mechanics and user-controlled camera
- MeeshoLanding Page

HTML · CSS · Bootstrap

 - Responsive front-end landing page clone with Bootstrap grid and mobile-first design
